

## What our clients say about us

*"Green Light Health and Safety Consultancy was very supportive to the needs of our organisation and the changes that were required. I found them to be very professional in their manner; also approachable and things were explained without the need for jargon."*

**Janet Prince CEO - Bedford Housing Link**

*"Working with Green Light Health and Safety has been a positive experience. The consultants are very knowledgeable, providing great help and advice to benefit our company. Green Light helped to set up a new H & S structure for us and is continuing to assist and assess our progress. I look forward to our continued partnership."*

**Nicola Emerton - Alere Ltd, Derwent House, Cranfield Technology Park, Bedford**

*"Green Light were very efficient and the service easy to understand, I was impressed with the company representative, who seemed to be one step ahead of me when I had a question or four regarding health and safety issues! Great service all round. Highly recommended."*

**Jaz Singh - Leading Motor Company (LMC) Bedford**

*"Green Light conducted an audit and inspection at school, prior to a visit from Bedford Borough Council to assess the health and safety of the premises. Having been somewhat confused about how to make progress with matters of health and safety, one call to Green Light allayed all our fears! Vital information was communicated in 'plain English' and the service was extremely friendly. This is a consultancy that will listen as well as tell. It was refreshing to have a tailored service rather than a 'one size fits all' approach. The streamlining of all paperwork has enabled all staff to understand the processes we have in place. Green Light has enabled us to take ownership health and safety issues - a fantastic service and a consultant who is always just a phone call away."*

**Anna Vallance - Head of English, John Bunyan School**

Health & Safety Consultancy

Giving your business the green light

**Don't take the risk**

**Green Light Consultancy...taking the risk out of Health & safety**

*Running any business without a proper health and safety policy is a bit like driving your car through a red light; you might get away with it once or twice, but sooner or later you'll come to a sticky end...it's just not worth the risk.*

## Negligence

**DO NOT IGNORE HEALTH AND SAFETY:**

**BE PRO-ACTIVE...**

**NOT REACTIVE**

## At Green Light Health & Safety Consultancy

*we have the skills and experience to steer you through the minefield of health and safety legislation, so you won't have to suffer the devastating consequences of getting it wrong. We offer our services to manufacturing, engineering, offices, shops, residential and care homes in the Beds, Herts, Cambs, Northants and Bucks area.*

## Plain English

*At Green Light we believe in straight forward communications that make sense. We take care to make sure our advice is practical and relevant to your business and that everyone involved in its application understands its aims and objectives.*

**Policies  
been  
reviewed?**

**Fire risk  
assessment  
completed?**

**Portable  
Appliance  
Testing  
completed?**

**Staff trained  
in health and  
safety?**

**If the answer is **NO** to any of the above questions, contact Green Light for a free initial meeting**

## Free initial meeting

*Every business is different, so at Green Light we look at every one individually before making our recommendations. We'll discuss the needs of your business with you and look at any areas that are of particular concern. The initial meeting is free and there is no obligation to proceed.*

**For this superb **VAT-FREE** service,** call today and see how Green Light can work with you to drive your business forward....safely.
